

Ortho Clinical Diagnostics (Ortho) is a global leader of in vitro diagnostics. Ortho serves two primary industries in the medical field: clinical laboratories, by producing platforms and assays that test for a variety of diseases, conditions, and substances; and immunohematology, by providing the means to ensure blood transfusion recipients receive appropriate and compatible blood.

We are recruiting for a **Staff Quality Engineer in Pompano Beach, FL** to provide leadership and technical support to Quality & Regulatory Compliance (QRC) and Operations staff on all aspects of the biological manufacturing process controls at the Pompano Beach manufacturing site. You will utilize key Quality Engineering (QE) principles, tools, and practices to develop and optimize systems and processes that are aligned with the overall business and the Quality Policy. You will also partner with manufacturing to implement process improvements and address quality events including non-conformance, product disposition, root cause investigation, complaint investigations and laboratory events.

The ideal candidate will possess a minimum of 8 years' experience in Quality, Regulatory and/or Compliance in a highly regulated manufacturing environment, a strong background in validation, statistical process controls, regulatory compliance, and knowledge of current and applicable GMP regulations is required.
